Education

Bandung Institute of Technology

Bandung, Indonesia

Bachelor of Water Resources Engineering and Management, Aug 2017 - Oct 2021

- Thesis : "Polder Design As A Flood Control In Cekungan Bandung, Andir, Baleendah Sub-District"
- The 1st Student With Highest GPA in Semester II - Year 2019/2020
- Drainage Engineering and Flood Control Assistant (Feb - Jun 2021)

Experience

June 2025 -

PT Tectona Mitra Utama

Bandung, Indonesia

Hydrology Engineer

- Conducted hydrological and hydraulic analyses using modeling tools (e.g., HEC-HMS, HEC-RAS) to support the design and risk assessment of water resource infrastructure.
- Conducted comprehensive hydrological surveys, including streamflow measurements and sediment sampling to collect baseline data for design and impact assessments.
- Provided technical recommendations for flood control, drainage, and river engineering projects based on quantitative modeling results and regulatory compliance.

Selected Consulting Engagements (NDA-Compliant):

- River Diversion Detailed Engineering Design - Coal mining operations, South Sumatra
- River Diversion Detailed Engineering Design - Coal mining operations, South Kalimantan
- Hydrology & hydrogeology study - Nikel mining operations, Southeast Sulawesi

May 2025 -

PT Suropati Hidro Energi

Bandung, Indonesia

Project Engineer

- Developed and implemented a comprehensive project monitoring system to track progress, identify bottlenecks, and support timely decision-making.
- Assisted in hydrology and hydraulic analysis for infrastructure and water resource projects if needed.

Selected Consulting Engagement:

- Junior Hydrology and Hydraulics Specialist For Consultancy services for the preparation of an integrated implementation plan for build back better, safer, and sustainable (bbbss) infrastructure in northern Sumatra - BAPPENAS, Northern Sumatra.
- Hydraulics Expert for Study on Raw Water Availability and Sustainability in the Sei Mangkei Special Economic Zone - PT KINRA, Sumatra Utara.
- Assistant of hydrology and hydraulics specialist for National Urban Flood Resilience Project (NUFReP) - BAPPENAS, Gorontalo.

Aug 2022 - May 2025

PT Brantas Abipraya

Jakarta, Indonesia

Management Trainee Program

- Plan and develop work schedules or action plans, including evaluating project progress.
- Assess and analyze project costs to ensure budget efficiency.
- Coordinate with various stakeholders, including the project director, consultants, vendors, and internal teams, to ensure smooth project execution.

Selected Construction Projects:

- MYC Budong - Budong DAM - PUPR, West Sulawesi
- MYC Mbay DAM II - PUPR, East Nusa Tenggara
- Loji-Banger River Flood and Coastal Tidal Flood Control II - PUPR, Central Java

Jul - Aug 2022

PT Infratama Yakti

Jakarta, Indonesia

Freelance Water Engineer

- Conducted water demand assessment and raw water availability analysis.
- Conducted hydraulic analyses using modeling tools (HECRAS) to support the design and risk assessment for the proposed WTP

Selected Consulting Engagement:

- Feasibility Study for Water Treatment Plan - PT KI Dumai, Riau
- Runoff Flooding Analysis of SPAM Karian - West Java

Juni 2021 - Jun 2022

PT Daya Agung Besari

Bandung, Indonesia

Project Engineer

- Lead 10 staff of the team to achieve all project goals.
- Managed 7 Projects about water resources engineering in 2021 and 4 Projects in 2022.
- Analyzed and Make decision about hydrology and hydraulics analysis.

Selected Consulting Engagement:

- Detailed Engineering Design (DED) for River Protection Structures in the Minapolitan Area, Manggar River
- Detailed Engineering Design (DED) for Raw Water Supply Development in Kelubi Village
- Detailed Design of Drainage Channels for the Ciujung Irrigation Area, Serang Regency
- Design Review for Riverbank Protection Structures along the Rokan River

Skills

Microsoft Office, ArcGIS, Global Mapper, Hydrognomon, Hec - HMS, Hec - RAS, WEAP, Canva

Languages

Indonesia (native), English (intermediate)

Achievement

- Speaker for "Pelatihan Pengelolaan Banjir dan Sedimentasi Sungai Menggunakan Hec-RAS", Feb 2025
- Runner Up of Dam Innovation Contest The 9th CEIC (HMS Universitas Diponegoro), Mar 2021
- Top 10 Essay Competition "Smart City Innovation Ideas" (HMP Panripta Lokas ITB), Dec 2020
